

SECTIONAL OVERHEAD DOORS

The **THERMASEAL™** Steel Door utilises a 45mm thick expanded polyurethane core and a mechanically-interlocked thermal break to provide maximum thermal efficiency.

Aluminium doors offer advanced design and appearance for heavy usage applications. Anodising provides for years of weatherproofing.

All doors can be fully automated, with track systems to suit normal or low headroom and vertical lift tracks.

DOCK LEVELLERS

The most successful Dock Leveller ever introduced by the industry, with over 100,000 units sold world-wide.

With a safe and simple design, ease of maintenance, few moving parts and an affordable price the **KELLEY FX®** Dockleveller has become the choice of material handling operations everywhere.

KELLEY ELEVATING DOCKS

Elevating Docks offer superior quality design, comprehensive safety features, a competitive price and a solid warranty. **KELLEY** also builds special application products to meet your lifting needs.

P.V.C. STRIP CURTAINS

P.V.C. Strip Curtain's are specially designed to reduce scratching, the edges of this crystal strip are rounded for additional safety. The entire product is resistant to damage from ultraviolet rays, while providing outstanding transparency.

PERSONNEL DOOR

The **PERSONNEL™** Door has been developed as a cost efficient access door for steel framed sheds, barns and domestic garages. A pressed colour steel panel door of distinction.

DOCK SHELTERS

Designed to accommodate a wide variety of door and trailer sizes while providing full width access to the back of the truck.

FIRE RATED ROLLER DOOR

4-hour rating manually or electronically operated available in a range of closing options (Fusible unit, solenoid release etc)

P.V.C. IMPACT DOORS

These double-action swing doors are essential for environments where heavy duty trolleys and pallets are being constantly moved.

Available in one- and two-leaf models, these doors feature adjustable tension springs with smooth operating, self-closing hinges.

Commercial Door Solution Specialists

DURADOOR

Trying to obtain high performance doors to fit standard openings, accommodating even the simplest of hardware and getting the doors painted before they start swelling can mean long supply times, additional onsite costs and all sorts of unwanted hassles.

ACEDOORS DURADOORS™ have been developed as a top quality metal door to avoid these problems and eliminate all onsite painting, fitting hardware, swelling and sticking problems associated with timber doors. The finish result is a permanent and attractive door, which is competitively priced against timber doors.

Standard features of the ACEDOORS DURADOOR™ include a unique door chamber that locks the core of the door into the outside channel. Resulting in a strong, yet lightweight door, with a light impact-resistant surface. A coded system ensures instant recognition of performance specifications to aid inspection and maintenance throughout the working life of the door.

FEATURES

- Designed to be installed into pre-cast concrete, timber, block work, insulated panel or long run roofing walls
- Eliminates all swelling, sticking and painting problems associated with timber doors
- Attractive appearance
- Maintenance free powder coated aluminium finish, no site painting needed
- Pre-hung in one piece frame with your hardware choice fitted
- Energy saving polyurethane foam core is used to deliver exceptional insulation values
