

**RUDNEV™** Door Systems specialise in doors for unconventional applications.

Individually designed and engineered to exacting tolerances using appropriately selected materials, correct insulation and hermetic sealing, ensure that these 'environmental type' doors meet every criteria

of your particular application.

Our technicians cater for many miscellaneous requirements where high humidity or other diverse conditions apply, supplying 'environmental type' doors specifically designed, styled and coloured to your satisfaction.

**Options include:**

- Double swing
- Insulated or heated vision panels
- Meat rail provision
- Kick plates
- Custom made to size

**Acedoors** produce hinged doors for both freezer and cool store configurations. The door construction and fittings are specially designed for the food industry and fulfil the environmental requirements of that industry as well as being able to withstand the rough treatment they can be exposed to.

**THERMADOOR**
