# HUSHSHUTTER 2

INDUSTRIAL ROLLER SHUTTER  
SILENCED GUIDES  
QUIET OPERATION  
LOW MAINTENANCE  
GREASE FREE

The Hushshutter2 is a high performance steel roller shutter door idea for industrial and commercial buildings. The product is specially designed for low to medium vehicle flow applications and offers reliable security, wind resistance and ventilation if required.

*Made In New Zealand*

The Hushshutter2 is a steel roller shutter that offers quiet operation with silenced guides. The innovative guide design incorporates full length PVC wear strips eliminating metal-to-metal contact for quieter operation. The grease-free guide makes it ideal for food and hygiene applications. Dual brake motors are used allowing a spring free barrel design. Spring free barrels eliminate safety issues due to spring failure and costly spring replacements.

Manufactured by AceDoors in NZ, the Hushshutter2 brings the latest roller shutter design to New Zealand.

**Technical Data**

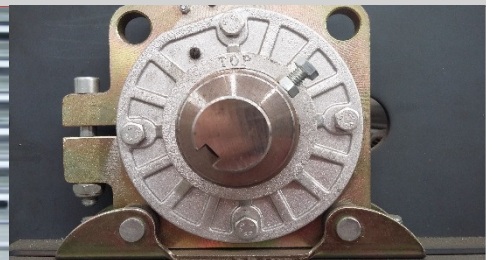

<b>Applications</b>	For External and Internal openings.
