- Trained service technicians are fully equipped to deal with any maintenance requirements

### **Preventative Maintenance Programme**

- Preventative Maintenance Programme ensures the installation operates at a safe and optimum level to avoid costly breakdowns
- Six-monthly follow up calls
- Full inspection of industrial door systems with minor adjustments and system lubrication where necessary
- Written report to detail work done and any recommended repairs

## Commercial Roller Shutters

Range of shutters for external applications including wind rated, high speed, insulated and shutters with silenced guides.

## Fast Acting Doors

Range of flexible high speed productivity doors for internal and external applications designed specifically for your trade, process, and building, to separate temperature controlled areas.

## Sectional Doors

Sectional doors for facilities requiring doors that offer maximum visibility or insulated sectional doors for maximum thermal protection.

## Freezer & Coolroom Doors

Range of process doors, specialised coolroom and freezer doors, each individually designed and engineered for all temperature ranges.

## PVC Strip Curtains & Swing Doors

PVC strip curtains provide an economical custom made solution to protect people and goods from adverse environmental conditions. Double-action PVC swing doors are durable and impact resistant for heavy duty trolley and pallet traffic areas.

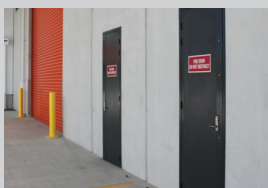

## Fire Solutions

Range of automatic fire curtains and smoke curtains. Fire rated sliding doors and egress doors.

## Egress Doors

AceDoors DuraDoor™ - top quality exterior grade metal door. Personnel door – cost efficient access door.

## Dock Seals & Levelers

Range of dock solutions including seals, shelters, levelers and vehicle restraints to accommodate a wide variety of door and trailer sizes.

## Insulated Traffic Doors

Insulated traffic doors, suitable for many temperature sensitive environments including walk-in chillers, supermarkets, restaurants and public hospitals.
