

Residential & Light Commercial

## A&B-Series Roller Doors

Quietly confident, steel curtain roller doors for a secure residential or light commercial environment.

### A & B - Series Roller Doors

Safeguarding your goods with a classic corrugated profile, the A&B-Series Roller Doors offers a timeless style complementary to kiwi cladding, in step with local conditions, ideal for use in town or country.

#### Key Features

The A-Series is a versatile style for residential applications including single car garages, small workshops, farm sheds, and storage facilities. The B-Series offers greater strength while maintaining a fluid design for larger openings in a residential or light commercial setting. Ideal for vehicle lock ups, agricultural facilities or workshops. Both profiles deliver on durability and performance, with the flexibility to adapt to your specific site requirements.

**Cohesive** – Made from 0.4mm Colorsteel Endura:registered: coil, our roller door curtains integrate seamlessly with common roofing and cladding found in New Zealand.

**Simple** – The sprung axle allows easy manual operation and, as a safety measure, supports the curtain.

**Durability** - The aluminium bottom bar strengthens the door and is fitted with a rubber weather seal to minimise dirt, leaves & other mess from coming in to your garage from outside.

#### Key Specifications

Effortless integration into pre-existing building materials delivers a clean finish, where style and security meet, delivering a classic exterior without compromising safety.

# Residential and Light Commercial Roller Doors

## A-Series

AceDoors A-Series Roller Door for the domestic market delivers a classic corrugated profile complementary to many New Zealand roofing and cladding designs. It is a versatile style for many applications including single car garages, small workshops, farm sheds, and storage facilities.

- Available in 0.4 BMT Colorsteel®
- 14mm corrugation depth
- Available in sizes up to 3.2m height and 3.0m width

## B-Series

AceDoors B-Series Roller Door offers a deeper, stronger profile while maintaining a fluid design for slightly larger openings in a residential or light commercial setting. This style is suited for vehicle lock ups, agricultural facilities, workshops and much more.

- Available in 0.4 BMT Colorsteel®
- 21mm corrugation depth
- Available in sizes up to 4.2m height and 4.0m width

## Features

### Roller Door Curtain

AceDoors Roller Door curtains are made from 0.4mm Colorsteel Endura® coil, which is also used for roofing and cladding in New Zealand.

### Sprung Axle

All Roller Doors are sprung. This allows easy manual operation and as a safety measure supports the curtain.

### Durability

The aluminium bottom bar strengthens the door and is fitted with a rubber weather seal to minimise dirt, leaves & other mess from coming in to your garage from outside.

### Guides

AceDoors Roller Door guides use Nylofelt for greaseless operation. This keeps operation exceptionally quiet and smooth and allows for much lower levels of maintenance.

## Operation

### Motorised

Single phase opener, safety reverse feature, simple installation and quiet operation. Includes 2 remotes.

### Manual

Simple manual operation by D-handle or a hand chain pulley for higher doors. Pulleys on larger doors are geared for easy operation.

## Options and accessories

- Centre lock
- Hand Chain operation
- Electric Motor with remote control operation

\*Conditions apply.

## Colour Range Available

The swatches above are a small representation of some of the New Zealand Colour Steel Range. AceDoors can also colour match to your requirements of your new door, check with your local dealer of available colours.
